Developing Our First Ansible Playbook

- > Steps to Develop Ansible Script(s)/Ansible Playbook(s):
 - > Step1: Playbooks extension is .yaml or .yml
 - > Step2: It must start with three hyphens (---)
 - > Step3: It can have minimum of one play but max any number
 - > Step4: Each play must have target(s) and task(s)
- > First Playbook:
 - ➤ Playbook to display: Welcome to Ansible Playbooks

```
name: Play to install webserver
hosts: "{{reqHosts}}"
gather_facts: true
become: true
tasks:
  - name: Installing webserver on RHEL Family
    ansible.builtin.yum:
      name: httpd
      state: present
      update_cache: true
    when: ansible_facts.os_family == "RedHat"
  - name: Installing webserver on Debian Family
    ansible.builtin.apt:
      name: apache2
      state: present
      update cache: true
    when: ansible facts.os family == "Debian"
```
