File Module

➢ **File module is useful**
   - ➢ **To create/delete a file/directory/link on managed nodes**
   - ➢ **To get the existing file details like mode,owner,group and size etc…**
   - ➢ **To modify the file parameters like mode, owner, group and access/modified time etc..**

➢ **Ansible Ad-hoc Command:**
   - ➢ **ansible <host-pattern> -m ansible.builtin.file -a "path=/tmp/demo.txt state=touch mode='0755'"**
