Modules to Install Packages

➢ We have different types of modules to install packages based on type of os_family
➢ They are:
  ➢ ansible.builtin.yum
  ➢ ansible.builtin.dnf
  ➢ ansible.builtin.apt
  ➢ ansible.builtin.package

➢ Ansible Ad-hoc Command:
  ➢ ansible <host-pattern> -m ansible.builtin.yum -a "name=nginx state=present" –b
  ➢ ansible <host-pattern> -m ansible.builtin.yum -a "name=httpd state=present" –b

  ➢ ansible <host-pattern> -m ansible.builtin.apt -a "name=nginx state=present" –b
  ➢ ansible <host-pattern> -m ansible.builtin.apt -a "name=apache2 state=present" –b

Ansible and Ansible-Playbooks For Automation
