How to check/validate Ansible Playbook(s) syntax(s) ?

➢ **There are two ways to validate the playbook syntax(s):**
  ➢ **ansible-playbook <playbookName> --syntax-check**
  ➢ **ansible-lint <playbookName>**
    ➢ **Note:**
      ➢ **ansible-lint is a third-party command**
      ➢ **Install it using: pip install ansible-lint**
      ➢ **ansible-lint analyses the code and finds potential errors, syntax errors, undefined variables, etc. in Ansible-Playbooks**
